About Me

I am a Systems Engineer with two years of experience in managing IT infrastructures and optimizing system performance. Passionate about continuous learning, I'm now looking for a new opportunity where I can apply my skills to solve technical challenges and contribute to business success.

Skills

- Organized
- Team work
- Meeting deadlines
- Critical Thinking
- Leadership

EXPERIENCE

System Engineer

Atos Global IT Solutions & Services Private Ltd India

Results-driven System Engineer with 2+ years of experience in IT infrastructure management, server administration, and incident resolution. Proficient in ServiceNow, VMware, and SCOM, with proven ability to maintain system uptime, optimize server performance, and automate processes using Ansible. Experienced in managing virtualization and cloud environments to ensure high availability and seamless enterprise operations.

CORE COMPETENCIES

- Ticketing & Incident Management:** ServiceNow, Ticket Resolution, SLA Management, Root Cause Analysis
- Server Administration:** Windows Server, VCenter, VM Management
- Automation Tools:** Ansible Templates, BMC, Azure Portal
- Virtualization & Cloud Technologies:** VMware ESXi, Vmotion, VCenter
- System Health Monitoring:** SCOM, VSS Writers Stability, Server Health Checks
- Server Maintenance:** Patching, VM Reboots, CPU & Memory Allocation
- Networking:** DNS Requests, Domain Joining
- Access Control:** RDP/Admin, Workgroup Server, Security Groups

PROFESSIONAL EXPERIENCE

- Ticketing System: Actively managed and resolved tickets using ServiceNow, with a focus on ensuring timely resolutions.
- Server Maintenance: Managed server patching through BMC tools, performing bulk patching across multiple servers in a structured, risk-free manner.
- Conducted VM restarts on VMware VCenter, ensuring minimal downtime and service disruptions.
- Supported VMotion activities on VMware VCenter, managing virtual machine migrations and ensuring high availability.
- Regularly performed housekeeping activities on C drive to optimize storage and prevent system degradation.
- Adding/ removing DNS entries from DNS as per requests for effective system performance.
- Handled tickets for CPU and memory resource allocation and adjustments.
- Restarted virtual machines (VMs) through vCenter and ensured their availability.
- Automated server decommissioning processes using Ansible templates.
- Performed domain joining and server reboots for system integration.
- Stabilized VSS writers for efficient backup operations.
- Put servers in maintenance mode (MM) during planned downtimes.
- Granted user access to workgroup servers and managed security group permissions for admin/RDP.
- Monitored server health and ensured performance optimization through SCOM.
- Added storage to disks based on system and application requirements.

ADDITIONAL INFORMATION

- Languages : English, Hindi, Marathi
- Hobbies/Interests: Enthusiastic about exploring automation tools, and emerging trends in cloud computing.
- Learning German Language.
- Certification : AWS Certified Cloud Practitioner – AWS Certification (via Udemy)
